

Acute GP Cornwall D-dimer nomogram

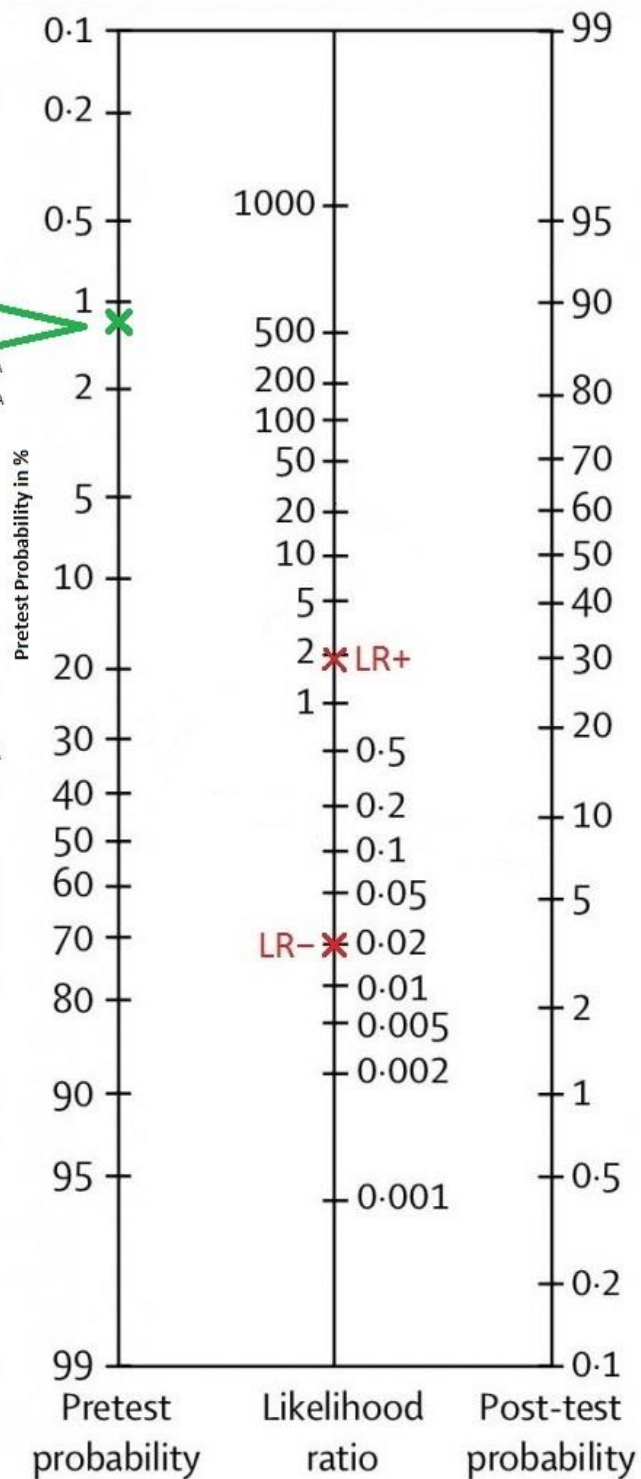

Wells Score	Pre-test Probability in %
0-1	1.3%
2-6	16.2%
7-12.5	40.6%

Wolf et al Ann Emerg Med 2004 44(5):503-10

2-Level Wells (less useful for nomogram)

Wells Score	Pre-test Probability in %
≤4	5.1%
>4	39.1%

Wells et al Thromb Hemost 2000 83(3):416-20

D-dimer nomogram - how to use:

- 1) calculate Wells pretest probability in percentage from the box on the left and plot on the left hand axis
- 2) trace a line from this through the likelihood ratio for a positive result (LR+) or for a negative result (LR-) depending on D-dimer result
- 3) read off corresponding right axis for post test probability of PE
